SUMMARY

Creative UI Developer with 4 years of experience, facilitating and supporting human interactions with complex systems and software. Maintaining user-centric designs while adhering to prescribed interface principles and related development goals. Dedicated to creating inviting and unintimidating interfaces for everything from simple open-source applications to complex proprietary systems.

EXPERIENCE

Front-end Engineer, Giz — Mar 2025 – Current

Lomé , Togo

As part of the Digital Transformation of the Togolese Economy (ProDigiT) initiative, this project supports the implementation of the Togo Digital 2025 Strategy by building a National Digital Observatory, a centralized platform designed to publish national digital indicators, valorize data, and generate the annual digital development report for Togo. The platform serves the general public, governmental bodies, and international institutions, providing structured digital insights and promoting evidence-based governance.

Key Responsibilities:

- Collaborated with the UI/UX unit to design and propose user interface models for both public and administrator-facing platforms.
- Developed responsive, accessible, and maintainable frontend interfaces aligned with the technical and functional architecture of the Observatory platform.
- Built interactive data-visualization components and selected appropriate graphical representations for national digital indicators.
- Integrated backend APIs to enable dynamic retrieval and presentation of data across platform modules.
- Implemented security mechanisms on the frontend, including authentication best practices, secure data flow handling, and protection measures aligned with modern web standards.
- Optimized frontend performance to ensure fast loading, smooth interactions, and efficient resource usage.
- Defined and executed unit and integration tests to ensure high-quality code reliability and platform stability.
- Participated in CI/CD processes, contributing to continuous integration and deployment pipelines.

Webmaster / Web Developer, Global Fellowship — Jan 2025 – Current

Remote

Global Fellowship (GF) is an international Christian youth organization supporting Boys' and Girls' Brigades worldwide. As Webmaster, I oversee the organization's digital presence, ensuring a reliable, accessible, and visually consistent web platform that connects members and partners globally.

Key Responsibilities:

- Designed, developed, and maintain the official Global Fellowship website using **WordPress**.
- Built and customized dynamic page layouts, event listings, and donation modules aligned with GF branding and mission.
- Implemented **SEO best practices** and content optimization to improve visibility and search ranking.
- Collaborated with global leadership teams to publish timely updates, newsletters, and media resources.
- Managed **plugin integrations**, backups, and security updates to maintain site integrity and uptime.
- Provided ongoing **technical support** and training to non-technical staff for content management.
- Continuously improved UI/UX to ensure an engaging and inclusive online experience for international users.

UI/UX Designer, Freelance — Mar 2022 – Mar 2025

Tema, Ghana

Improved and expanded project platforms using Figma to develop rich User Interfaces. Communicated with product managers and UX designers to translate project requirements and business objectives into polished user interfaces. Worked closely with UX and product teams to define visual and functional requirements. Used the Agile Scrum model to deliver solutions with high level of flexibility and adaptability. Converted abstract ideas and requirements into user personas and storyboards.

Senior Software Developer, AFripul Group — Oct 2021 – Aug 2024

Lome

Designed and developed an e-commerce app using Flutter. Trained new developers and programmers on company standards for design and review. Developed e-commerce web application (Woreber) with React and Express. Monitored ongoing operation of assigned programs and responded to problems by diagnosing and correcting logic and coding errors. Discussed project progress with customers collected feedback on different stages and directly addressed concerns. Collaborated with fellow engineers to evaluate software and hardware interfaces.

EDUCATION

Kwame Nkrumah University of Science And Technology — 2017 – 2021

Bachelor of Science, Computer Science — Kumasi, Ghana

Zion College — 2013 – 201G

WASSCE Certificate, — Anloga, Ghana

SKILLS

- UI/UX Design
- Visual Communication
- Git and Version Control
- React.js/Nextjs
- Node.js
- Prototyping
- Web Development
- WordPress
- TypeScript
- Express.js

HOBBIES AND INTERESTS

- Artificial Intelligence
- Data Science
- Web3
- Blockchain
